MISSION

Designing and manufacturing innovative and reliable solutions for power transmission and control in the industrial sectors, promoting sustainable development shared worldwide. S.T.M. is market driven and strives to be a company “easy to work with” and with high customer orientation for creating long term partnerships. Our Values: Transparency, Cooperation and Wilfulness.

CERTIFICATIONS

Year after year S.T.M. and G.S.M. have been developing and consolidating a worldwide acknowledged know-how in designing and building power transmission products and components.

This knowledge and experience in designing and building was certified in full conformity with ISO 9001 International Quality Certification Rules.

SERVICES

INTERACTIVE

Focus on interactivity and quality of service to their customers, S.T.M. and G.S.M. provide the opportunity to check “on line” the orders status.

AFTER SALES

A service managed by dedicated staff to ensure a high standard in response time.

CATALOGUES ARCHIVE

A digital archive supplies all information for items that are no longer produced.

RED BUTTON

Assembly and shipment within 48h.

STANDARD

Standard line, thanks to its flexibility in application, is the best value for money.

HIGH TECH

The High Tech line is designed to provide the best results in those applications requiring top performance in continual use, so that durability is the best solution.

ELECTRONIC

Electronic line is an important reference in every control integrated system for logistics.

CUSTOM

Custom line provides a good solution to those requests for the development of a specifically intended product for customers special applications.

LEAFLETS

S.T.M. is consistently committed to research and develop specific products for a wide range of applications.

The evolution of the market, mainly in the field of energy, calls for innovative solutions, more efficient and sustainable each time. S.T.M. picks up the gauntlet and sets to develop a full range of products that can meet each new demand and requirement as one of its main objectives.
